Dear Business Partners

Notification of New Functions of our PV cloud service
(Japanese service only)

We are pleased to inform you that the following functions have been added to our "PV Cloud Service".

1. DC/AC ratio comparison function

In addition to displaying a breakdown of simulation results for each installation location, it is also possible to compare DC and AC capacities in five different sizes for the amount of electricity generated in each month of the first year and the annual peak shaving amount.

2. Transition function to self-consumption simulation

Data entered in the PV simulation can now be transferred directly to the self-consumption simulation with one-click.

*User login ID and PW are required to access the link.
