Dear Business Partners

Notification of New Functions of our PV cloud service
(Japanese service only)

We are pleased to announce that the following functions have been added to the menu of “Power generation simulation” and “Self-consumption simulation” of the PV Cloud Service.

1. Functions for CO2 emission reduction and cost-effectiveness calculation.
2. Functions for saving history, searching history, and deleting selected history.
3. Function for automatic calculation of number and selection of PV module to the type and area of PV plant.

*User login ID and PW are required to access the link.
