Dear Business Partners

Notification of New Functions of our PV cloud service

We are pleased to announce that the following functions have been added in our PV Cloud Service.

1. Power generation simulation and Self-consumption simulation:

- The first-year degradation rate and aging degradation rate of the selected panel is automatically displayed.
- Function of display and selection of PV inverters.
- Conversion efficiency of selected PV inverter is automatically displayed.

2. Power generation simulation:

- Electricity selling price and simulation (FIT) period can be input and modified.
- Function for setting the selling price and simulation period after the end of the simulation (FIT) period.

*User login ID and PW are required to access the link.
